

Church Energy Survey

Please complete this survey about energy saving steps in your church.

This information will be used in a presentation by Pam McVety, Stewardship of Creation Enabler, Presbytery of Florida for a workshop in Texas at the national Presbyterian eco-justice workshop in October.

Name of the church and location:

Has the church done any of the following?

1. Yes__ No__ Installed compact fluorescent light bulbs?
2. About how many? _____
3. Yes__ No__ Raised/lowered the thermostat settings to 78 degrees in the summer and 68 degrees in the winter?
4. Yes__ No__ Installed a programmable thermostat?
5. Yes__ No__ Lowered the temperature on the hot water heater?
6. Yes__ No__ Wrapped it with insulation?
7. Yes__ No__ Posted a notice to turn off the lights when a room is empty?
8. Yes__ No__ Recycle?
9. About what percentage of recyclable materials are recycled? _____?
10. Yes__ No__ Purchased a vehicle for the church that gets better gas mileage?
11. Yes__ No__ Purchased a hybrid vehicle? If yes, what make?

12. Yes__ No__ Installed solar panels?
13. Yes__ No__ Implemented other energy saving strategies such as closing drapes/shades, replacing windows, installing a more energy efficient appliance, etc?
14. If yes, what?

15. Yes__ No__ Have you heard about the concept of going carbon neutral?
16. Yes__ No__ Is the church family carbon neutral?
17. Yes__ No__ Would you like to know more about how to go carbon neutral? If yes, please contact Pam McVety at mcvety@nettally.com.
18. Yes__ No__ Preached on caring for creation and the importance of saving energy?
19. Yes__ No__ Sunday school classes discuss caring for creation and the importance of saving energy?

Thank you very much for completing this survey.

Please email it to mcvety@nettally.com.
